## **DETAILED ACTION**

## Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-7, drawn to a method of repairing a gas turbine engine compressor blade airfoil, classified in class 29, subclass 889.10.
- II. Claims 8-14, drawn to a method of repairing a gas turbine engine rotor blade, classified in class 29, subclass 889.10.
- III. Claims 15-19, drawn to a method of replacing a portion of a gas turbine engine rotor blade, classified in class 29, subclass 889.10.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I does not require the details such as uncoupling a compressor rotor blade, using a plasma-arc weld process, and contouring the titanium weld material for patentability. The subcombination has separate utility such as use in a combination that does not require removing at least some of the titanium weld material to obtain pre-desired finished dimensions.

Application/Control Number: 10/699,354 Page 3

Art Unit: 3729

- 3. Inventions of Group I and Group III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I does not require the details such as having an airfoil with a first sidewall, a second side wall and contouring the titanium weld material for patentability. The subcombination has separate utility such as use in a combination that does not require removing at least some of the titanium weld material to obtain pre-desired finished dimensions.
- 4. Inventions of Group II and Group III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group II does not require the details such as having an airfoil with a first and second sidewalls for patentability. The subcombination has separate utility such as use in a combination that does not require uncoupling a compressor rotor blade.
- 5. A telephone call was made to Phillip Shipley on 2-9-2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3729

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sarang Afzali whose telephone number is 571-272-8412. The examiner can normally be reached on 7:00-3:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on 571-272-4690. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
